

Universal Autodual Model ADSE Auto Lead/Lag Controller at UCONN, Storrs, CT

Converted the climate control compressors at 6 locations at UCONN, Storrs, from standard "alternating start/stop control" to Autodual Automatic Lead/Lag Control. Autodual installation resulted in high efficiency operation, motors running cool with stress-free unloaded starts. L.O.P. shutdowns with remote sendout protected the compressors along with the timed panel-mounted Auto Drain system.

Two Quincy QR Series Climate Control

Totally automated stress-free lead/lag operation provided by the Universal Autodual Model ADSE
